

Health and Safety Policy

Streamline Connect (Streamline) is committed to providing and maintaining a workplace environment that protects the health, safety and wellbeing of our employees, contractors and communities where we operate.

Streamline focuses on ensuring that every day people go home in the same state that they came to work. To achieve this, we commit to:

- Provide healthy and safe working conditions for the prevention of work-related injury and ill health;
- Eliminate hazards and reduce health and safety risks;
- Make continual improvement to the health and safety management system and communicate updates;
- Consult and involve employees, and, where they exist, employees' representatives;
- Champion and reinforce the principle that no job is so important that it cannot be done safely;
- Make health and safety an integral part of everything we do;
- Demonstrate safety leadership by promoting the active participation of our employees, contractors and other affected parties in the management of their own and others' health and safety;
- Meet or exceed all applicable legal requirements and other requirements related to the health and safety of our employees, contractors and the public; and
- Provide effective rehabilitation support and services to employees in the event of a work-related injury or ill-health.

It is expected that employees will apply due care and diligence in all aspects of their work to prevent work-related injury or ill-health. Employees must take reasonable care for their own safety and health, avoiding behaviour that might harm the safety or health of others.

This policy provides a framework for setting health and safety objectives and shall be communicated to all employees and be available to interested parties.
